

Save Energy—Save Money

Fall and winter months are around the corner, are you prepared? Use the following tips to help save energy and money as the temperatures drop.

- **Thermostat Management**— Lower your thermostat setting and set lower when you aren't home or when you're asleep.
- **Home Insulation and Sealing**— Seal air leaks around windows, doors, and vents with weather stripping and caulk. Add insulation to your attic and walls.
- **Appliance Efficiency**—Choose energy efficient appliances, especially water heaters, furnaces and ovens.
- **Heating Habits**—Close curtains or blinds at night to prevent heat loss. Avoid blocking vents with furniture. Use space heaters sparingly and only in targeted areas.
- **Water Heating**— Lower the temperature setting on your water heater to 120 degrees Fahrenheit.
- **Professional Services**— Get a home energy audit to identify areas for improvement. Consult a qualified contractor for major upgrades like furnace replacement or insulation installation.

IF YOU SMELL GAS...

S

 SAFETY

Did you know that while natural gas is safe to use in your home, a **gas leak could be dangerous?**

The RNG natural gas is odorized. RNG delivers odorized natural gas in pipelines ranging in size from 1" to 6". You can recognize a natural gas leak in several ways, including an unusual hissing noise, blowing dirt for no apparent reason, an unusual dry spot in the ground or dead vegetation for no apparent reason, bubbling water, and frozen ground in warm weather.

If you ever smell natural gas inside or outside your home, leave the area immediately! Then from a safe distance, call 911 and then call Raton Natural Gas Company at 575.447.0088.

RNG is available 24 hours a day every day of the year at 575.447.0088. We'll investigate and let you know when it's safe to return.
